

Astronergy source Energy Storage

Solutions from **LG CNS** and

KapJin Samsung SDI

Astronergy hold the advantage in ESS, Taiwan and South Korea company have such high technological superiority

Offering a suite of state of the art energy storage technologies, which are **superior to Tesla, at a better price and lower operating cost**

World Leading Solar Farm Builders

Exelle & Associates are an infrastructure development finance provider with a range of solutions to answer your needs. Our wealth of accumulated experience and international partnerships translate into completion of projects at lower costs with increased return on investment. After many years of national grid and super scale construction in every sector, Exelle and partners have acquired the resources and protocols to drive your project to success.

We Look After Your Yield

Exelle make it a priority to ensure that your solar plant remains a profitable and reliable instrument. We apply our full suite of services and the accumulated experiences of our teams, to mitigate and manage any potential failures and faults. We further make it a priority to keep your plant operating at its best, delivering optimized functionality while maintaining an essential and reliable performing asset that continues to return an attractive rate of return.

Leaseback or Public Private Partnerships are available to local, state, regional governments
