

# 50MW to 100MW+

State & Regional **Utility Scale** Photovoltaic  
Power **Localized Generation** for Public  
Facilities, National Infrastructure and Private Industry

Design and development, finance and construction by Longigroup and GCL Astronergy, the largest and most accomplished solar companies in the world

## Take Advantage Of All Leverage

1. *Feed-in-tariff* or *grid purchase price*, as negotiated with power grid stakeholders or government regulatory authority
2. *Power procurement agreements*, can ensure viability and long term security, normally 20 to 25 years of bankable income
3. Our supply and logistic teams employ a globally centralized approach, to leverage buying power and minimize your costs
4. Astronergy can provide the funding and technology to drive projects to completion
5. Our international supply chain network and procurement protocols, command strong purchasing power and ensure the timely delivery of Exelle & Associate's superior quality modules and system components.

## Greater Performance & Higher Yields

Exelle make it a first priority to ensure that your solar plant remains a profitable investment. We apply our full suite of services and the accumulated experiences of our team, to mitigate and manage failures and faults. We make it a priority to keep your plant performing at its best, achieving the realization of a smooth and functional asset that continues to deliver dependable supply of service with sound returns on investment. We formulate and apply preventive maintenance concepts leading to sustainability and performance. Exelle Solar customize their protocols to realize the most efficient operating costs and lowest levelized cost of electricity.

Leaseback or Public Private Partnerships are available to local, state, regional governments
